Country classification

Data sources, country classifications and aggregation methodology

The statistical annex contains a set of data that the *World Economic Situation and Prospects* (WESP) employs to delineate trends in various dimensions of the world economy.

Data sources

The annex was prepared by the Development Policy and Analysis Division (DPAD) of the Department of Economic and Social Affairs of the United Nations Secretariat (UN/DESA). It is based on information obtained from the Statistics Division and the Population Division of UN/DESA, as well as from the five United Nations regional commissions, the United Nations Conference on Trade and Development (UNCTAD), the United Nations World Tourism Organization (UNWTO), the International Monetary Fund (IMF), the World Bank, the Organization for Economic Cooperation and Development (OECD), and national and private sources. Estimates for the most recent years were made by DPAD in consultation with the regional commissions, UNCTAD, UNWTO and participants in Project LINK, an international collaborative research group for econometric modelling coordinated jointly by DPAD and the University of Toronto. Forecasts for 2014 and 2015 are primarily based on the World Economic Forecasting Model of DPAD, with support from Project LINK.

Data presented in WESP may differ from those published by other organizations for a series of reasons, including differences in timing, sample composition and aggregation methods. Historical data may differ from those in previous editions of WESP because of updating and changes in the availability of data for individual countries.

Country classifications

For analytical purposes, WESP classifies all countries of the world into one of three broad categories: developed economies, economies in transition and developing economies. The composition of these groupings, specified in tables A, B and C, is intended to reflect basic economic country conditions. Several countries (in particular the economies in transition) have characteristics that could place them in more than one category; however, for purposes of analysis, the groupings have been made mutually exclusive. Within each broad category, some subgroups are defined based either on geographical location or on ad hoc criteria, such as the subgroup of "major developed economies", which is based on the membership of the Group of Seven. Geographical regions for developing economies are as follows: Africa, East Asia, South Asia, Western Asia, and Latin America and the Caribbean.¹

Names and composition of geographical areas follow those specified in the statistical paper entitled "Standard country or area codes for statistical use" (ST/ESA/STAT/SER.M/49/Rev. 4).

In parts of the analysis, a distinction is made between fuel exporters and fuel importers from among the economies in transition and the developing countries. An economy is classified as a fuel exporter if the share of fuel exports in its total merchandise exports is greater than 20 per cent and the level of fuel exports is at least 20 per cent higher than that of the country's fuel imports. This criterion is drawn from the share of fuel exports in the total value of world merchandise trade. Fuels include coal, oil and natural gas (table D).

For other parts of the analysis, countries have been classified by their level of development as measured by per capita gross national income (GNI). Accordingly, countries have been grouped as high-income, upper middle income, lower middle income and low-income (table E). To maintain compatibility with similar classifications used elsewhere, the threshold levels of GNI per capita are those established by the World Bank. Countries with less than \$1,035 GNI per capita are classified as low-income countries, those with between \$1,036 and \$4,085 as lower middle income countries, those with between \$4,086 and \$12,615 as upper middle income countries, and those with incomes of more than \$12,615 as high-income countries. GNI per capita in dollar terms is estimated using the World Bank Atlas method,² and the classification in table E is based on data for 2012.

The list of the least developed countries (LDCs) is decided upon by the United Nations Economic and Social Council and, ultimately, by the General Assembly, on the basis of recommendations made by the Committee for Development Policy. The basic criteria for inclusion require that certain thresholds be met with regard to per capita GNI, a human assets index and an economic vulnerability index.³ As at 29 November 2013, there were 49 LDCs (table F).

WESP also makes reference to the group of heavily indebted poor countries (HIPCs), which are considered by the World Bank and IMF as part of their debt-relief initiative (the Enhanced HIPC Initiative). In September 2013, there were 39 HIPCs (see table G).

Aggregation methodology

Aggregate data are either sums or weighted averages of individual country data. Unless otherwise indicated, multi-year averages of growth rates are expressed as compound annual percentage rates of change. The convention followed is to omit the base year in a multi-year growth rate. For example, the 10-year average growth rate for the decade of the 2000s would be identified as the average annual growth rate for the period from 2001 to 2010.

WESP utilizes exchange-rate conversions of national data in order to aggregate output of individual countries into regional and global totals. The growth of output in each group of countries is calculated from the sum of gross domestic product (GDP) of individual countries measured at 2005 prices and exchange rates. Data for GDP in

See http://data.worldbank.org/about/country-classifications.

³ Handbook on the Least Developed Country Category: Inclusion, Graduation and Special Support Measures (United Nations publication, Sales No. E.07.II.A.9). Available from http://www.un.org/esa/analysis/devplan/cdppublications/2008cdphandbook.pdf.

⁴ IMF, Debt Relief Under the Heavily Indebted Poor Countries (HIPC) Initiative Available from http://www.imf.org/external/np/exr/facts/pdf/hipc.pdf

2005 in national currencies were converted into dollars (with selected adjustments) and extended forwards and backwards in time using changes in real GDP for each country. This method supplies a reasonable set of aggregate growth rates for a period of about 15 years, centred on 2005.

The exchange-rate based method differs from the one mainly applied by the IMF and the World Bank for their estimates of world and regional economic growth, which is based on purchasing power parity (PPP) weights. Over the past two decades, the growth of world gross product (WGP) on the basis of the exchange-rate based approach has been below that based on PPP weights. This is because developing countries, in the aggregate, have seen significantly higher economic growth than the rest of the world in the 1990s and 2000s and the share in WGP of these countries is larger under PPP measurements than under market exchange rates.

Table A

Developed economies

| | Europe | | | Major developed |
|----------------|----------------------|--------------|----------------------|-----------------------|
| European Union | New EU member States | Other Europe | Other countries | economies (G7) |
| EU-15 | Bulgaria | Iceland | Australia | Canada |
| Austria | Croatia | Norway | Canada | Japan |
| Belgium | Cyprus | Switzerland | Japan | France |
| Denmark | Czech Republic | | New Zealand | Germany |
| Finland | Estonia | | United States | Italy |
| France | Hungary | | | United Kingdom |
| Germany | Latvia | | | United States |
| Greece | Lithuania | | | |
| Ireland | Malta | | | |
| Italy | Poland | | | |
| Luxembourg | Romania | | | |
| Netherlands | Slovakia | | | |
| Portugal | Slovenia | | | |
| Spain | | | | |
| Sweden | | | | |
| United Kingdom | | | | |

Table B Economies in transition

| South-Eastern Europe | Commonwealth of Independent States and Georgia | | | | | |
|------------------------------|------------------------------------------------|---------------------|--|--|--|--|
| Albania | Armenia | Republic of Moldova | | | | |
| Bosnia and Herzegovina | Azerbaijan | Russian Federation | | | | |
| Montenegro | Belarus | Tajikistan | | | | |
| Serbia | Georgia ^a | Turkmenistan | | | | |
| The former Yugoslav Republic | Kazakhstan | Ukraine | | | | |
| of Macedonia | Kyrgyzstan | Uzbekistan | | | | |

a Georgia officially left the Commonwealth of Independent States on 18 August 2009. However, its performance is discussed in the context of this group of countries for reasons of geographic proximity and similarities in economic structure.

Table C

Developing economies by region^a

| Africa | | Asia | Latin America and the Caribbean | |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------|--|

| Democratic Republic of the Congo | Rwanda | | |
| Ethiopia | Sao Tome and Principe | | |
| Gambia | Senegal | | |
| Ghana | Sierra Leone | | |
| Guinea | Togo | | |
| Guinea-Bissau | Uganda | | |
| Guyana | United Republic of Tanzania | | |
| Haiti | Zambia | | |

a Countries that have qualified for irrevocable debt relief under the HIPC Initiative.

b Samoa will graduate from the list of the least developed countries in January 2014.

b Countries that have qualified for assistance under the HIPC Initiative (that is to say, have reached decision point), but have not yet reached completion point.

c Countries that are potentially eligible and may wish to avail themselves of the HIPC Initiative or the Multilateral Debt Relief Initiative (MDRI).

Table H Small island developing States

| United N | ations members | Non-UN Members/Associate Members of the Regional Commissions |
|---------------------|-----------------------|--------------------------------------------------------------|
| Antigua and Barbuda | Marshall Islands | American Samoa |
| Bahamas | Mauritius | Anguilla |
| Bahrain | Nauru | Aruba |
| Barbados | Palau | Bermuda |
| Belize | Papua New Guinea | British Virgin Islands |
| Cabo Verde | Saint Kitts and Nevis | Cayman Islands |
| Comoros | Saint. Lucia | Commonwealth of Northern |
| Cuba | Saint Vincent and the | Marianas |
| Dominica | Grenadines | Cook Islands |
| Dominican Republic | Samoa | Curacao |
| Federated States of | São Tomé and Príncipe | French Polynesia |
| Micronesia | Seychelles | Guadeloupe |
| Fiji | Singapore | Guam |
| Grenada | Solomon Islands | Martinique |
| Guinea-Bissau | Suriname | Montserrat |
| Guyana | Timor-Leste | New Caledonia |
| Haiti | Tonga | Niue |
| Jamaica | Trinidad and Tobago | Puerto Rico |
| Kiribati | Tuvalu | Turks and Caicos Islands |
| Maldives | Vanuatu | U.S. Virgin Islands |

Table I Landlocked developing countries

| | Landlocked developing countries | |
|----------------------------------|--------------------------------------|-------------------------------------------|
| Afghanistan | Lesotho | Mongolia |
| Armenia | Malawi | Nepal |
| Azerbaijan | American Samoa | Niger |
| Bhutan | Anguilla | Paraguay |
| Bolivia (Plurinational State of) | Aruba | Rwanda |
| Botswana | Bermuda | South Sudan |
| Burkina Faso | British Virgin Islands | Swaziland |
| Burundi | Cayman Islands | Tajikistan |
| Central African Republic Chad | Commonwealth of Northern Marianas | The former Yugoslav Republic of Macedonia |
| Ethiopia | Cook Islands | Turkmenistan |
| Kazakhstan | Curacao | Uganda |
| Kyrgystan | French Polynesia | Uzbekistan |
| Lao People's Democratic | Mali | Zambia |
| Republic | Republic of Moldova | Zimbabwe |
